

# MIKEL KAMEL

Full Stack Software Engineer • React • TypeScript • C# • .NET • Azure  
Somerset, NJ • mikel.kamel.wark@gmail.com • 609-373-9470 • [mikelkamel.com](https://mikelkamel.com) • [LinkedIn](#)

## PROFESSIONAL SUMMARY

---

Full Stack Engineer with 4+ years of experience building enterprise-grade web applications used by 3,000+ users across global engineering teams. Specializes in high-performance React frontends, reusable component architectures, and end-to-end feature ownership across TypeScript, C#.NET, and Azure. Brings a rare combination of software depth and firsthand domain knowledge in engineering workflows and infrastructure — enabling faster, more accurate product decisions in technical environments. Proven track record of measurably reducing load times, increasing release velocity, and translating complex domain requirements into intuitive, scalable UIs.

## TECHNICAL SKILLS

---

**Languages:** C#, TypeScript, JavaScript (ES6+), SQL

**Frontend:** React, Redux, HTML5, CSS3, Responsive Design, Accessibility (WCAG)

**Backend:** .NET, ASP.NET Core Web API, REST APIs, Node.js, Express

**Desktop / Hybrid:** .NET MAUI, Blazor, Electron

**Cloud & DevOps:** Microsoft Azure (App Services, Azure SQL), Azure DevOps, CI/CD Pipelines, Docker

**Tools:** Git, GitHub, Bitbucket, VS Code, JetBrains Rider, Figma, SSMS, NuGet

## PROFESSIONAL EXPERIENCE

---

### TÜV SÜD — Software Engineer — Full Stack

United States • Dec 2022 – Present

*Building enterprise inspection and compliance platforms serving 3,000+ users across 12+ countries.*

- ▶ Architected SMARTS ReportBuilder, a schema-driven UI engine enabling dynamic generation of complex forms and reports without redeployment — eliminating an estimated 2–3 engineering days per release cycle and increasing system flexibility for non-technical stakeholders.
- ▶ Owned end-to-end delivery of SMARTS Central, a scalable React platform supporting multi-step inspection report workflows; optimized frontend rendering and data-fetching strategies, reducing perceived load times by 25–40% across key user-facing flows.
- ▶ Designed and scaled a reusable component library and state management patterns (React + Redux) adopted across 3+ internal applications, cutting per-feature frontend development time by approximately 30%.
- ▶ Led development of an AI-assisted chatbot (Azure + OpenAI) that translates natural language into SQL queries, enabling engineers to access operational data without writing queries — architected to keep all sensitive client data within internal infrastructure.
- ▶ Owned the migration from manual deployments to Azure DevOps CI/CD pipelines, increasing release reliability and enabling more frequent, lower-risk deployments.
- ▶ Partnered cross-functionally with product managers, designers, and backend engineers to define API contracts and data models powering dynamic frontend experiences at global scale.
- ▶ Mentored junior engineers through code reviews and technical guidance, improving code quality and consistency across shared internal platforms.

### Astriata — Software Engineer — Frontend

Remote • Nov 2021 – Nov 2022

- ▶ Developed responsive, accessible web applications in React and TypeScript across healthcare, government, and education sector clients.
- ▶ Built a reusable component library adopted across multiple client projects, standardizing UI patterns and reducing new project ramp-up time.
- ▶ Translated Figma designs into production-ready React components, consistently meeting accessibility (WCAG) and performance requirements.
- ▶ Collaborated directly with backend engineers and client stakeholders to ship production features aligned to business requirements.

### Freelance — Web Developer / Gameplay Programmer

Remote • Dec 2020 – Dec 2021

- Designed and developed client websites and web applications using React, HTML5, CSS3, and JavaScript; refactored existing platforms to improve responsiveness, accessibility, and SEO performance.
- Developed Unity3D game projects in C#, independently implementing core gameplay systems and mechanics.

## PREVIOUS EXPERIENCE

---

### **Gladstone Design, Inc. — Design Engineer**

*New Jersey • Sep 2019 – Dec 2020*

- Standardized internal engineering workflows by introducing project checklists, reducing preparation time by ~50%.
- Designed stormwater management systems that reduced construction and maintenance costs by up to 60% on multiple projects.

### **Geo-Technology Associates, Inc. — Construction Inspector**

*New Jersey • Sep 2018 – Aug 2019*

- Conducted construction site inspections and assisted geotechnical engineers with soil investigations, site evaluations, and technical reporting.

## EDUCATION

---

### **New Jersey Institute of Technology (NJIT) — Bachelor of Science, Civil Engineering • 2018**

*Domain expertise in engineering workflows, infrastructure systems, and technical compliance — directly applicable to software built for the engineering sector.*
