

MIKEL KAMEL

Software Engineer, Frontend • React • TypeScript • Design Systems • Performance • Accessibility
Somerset, NJ • mikel.kamel.wark@gmail.com • 609-373-9470 • mikelkamel.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Software Engineer with 4+ years of experience building enterprise-grade React applications used by 3,000+ users across global engineering teams. Specialized in high-performance frontend architecture, reusable component systems, schema-driven UI rendering, and end-to-end product delivery using React, TypeScript, and modern state management. Proven track record of reducing load times, accelerating release velocity, and translating complex domain workflows into intuitive, scalable user experiences. Full-stack capable with C#/.NET and Azure, enabling strong collaboration across API, data, and platform boundaries.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Responsive Design, Accessibility (WCAG), Component Libraries, Performance Optimization

Backend: C#, .NET, ASP.NET Core Web API, REST APIs, Node.js, Express

Desktop / Hybrid: .NET MAUI, Blazor, Electron

Cloud & DevOps: Microsoft Azure (App Services, Azure SQL), Azure DevOps, CI/CD Pipelines, Docker

Tools: Git, GitHub, Bitbucket, VS Code, JetBrains Rider, Figma, SSMS, NuGet

PROFESSIONAL EXPERIENCE

TÜV SÜD — Software Engineer, Frontend / Full Stack

United States • Dec 2022 – Present

Building enterprise inspection and compliance platforms serving 3,000+ users across 12+ countries.

- ▶ Architected SMARTS ReportBuilder, a schema-driven React UI rendering engine enabling dynamic generation of complex forms and reports without redeployment — eliminating an estimated 2–3 engineering days per release cycle and increasing product flexibility for non-technical stakeholders.
- ▶ Owned frontend architecture for SMARTS Central, designing scalable rendering, data-fetching, and multi-step workflow patterns that reduced perceived load times by 25–40%.
- ▶ Designed and scaled a reusable component library and shared frontend patterns adopted across 3+ internal applications, cutting per-feature development time by ~30%.
- ▶ Engineered schema-driven form workflows supporting conditional rendering, nested state, and complex validation logic — enabling non-technical teams to configure inspection reports without engineering involvement.
- ▶ Established consistent state management patterns using React + Redux alongside atomic/lightweight approaches, improving maintainability and reducing regression risk across dynamic workflows.
- ▶ Led frontend UX implementation for an AI-assisted chatbot interface (Azure + OpenAI), translating complex operational data access into intuitive conversational workflows for engineering users.
- ▶ Partnered closely with product managers, designers, and backend engineers to define API contracts and user flows powering global enterprise experiences.
- ▶ Mentored junior engineers through code reviews, frontend architecture guidance, and best practices around reusable UI design.

Astriata — Software Engineer, Frontend

Remote • Nov 2021 – Nov 2022

- ▶ Developed responsive, accessible web applications in React and TypeScript across healthcare, government, and education sector clients.
- ▶ Built reusable component libraries adopted across multiple client projects, standardizing UI patterns and reducing new project ramp-up time.
- ▶ Translated Figma designs into production-ready React components while consistently meeting accessibility (WCAG) and performance requirements.
- ▶ Improved maintainability by refactoring legacy UI code into scalable, component-based frontend architecture.
- ▶ Collaborated directly with backend engineers and stakeholders to ship customer-facing features aligned with business goals.

Freelance — Web Developer / Gameplay Programmer

Remote • Dec 2020 – Dec 2021

- Designed and developed client websites and web applications using React, HTML5, CSS3, and JavaScript; refactored existing platforms to improve responsiveness, accessibility, and SEO performance.
- Developed Unity3D game projects in C#, independently implementing gameplay systems and mechanics.

PREVIOUS EXPERIENCE

Gladstone Design, Inc. — Design Engineer

New Jersey • Sep 2019 – Dec 2020

- Standardized internal engineering workflows by introducing project checklists, reducing preparation time by ~50%.
- Developed deep domain expertise in engineering workflows and compliance systems — now directly applied to building enterprise software UX for those same users.

Geo-Technology Associates, Inc. — Construction Inspector

New Jersey • Sep 2018 – Aug 2019

- Conducted field inspections and technical evaluations, building firsthand understanding of the engineering user workflows now modeled in enterprise software.

EDUCATION

New Jersey Institute of Technology (NJIT) — Bachelor of Science, Civil Engineering • 2018
