

MIKEL KAMEL

Software Engineer (Full Stack) • React • TypeScript • C# • .NET • Azure
Somerset, NJ • mikel.kamel.wark@gmail.com • 609-373-9470 • mikelkamel.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years building React, TypeScript, C#/.NET, and Azure applications used by 5,000+ global users. Experienced in frontend architecture, scalable backend APIs, AI-powered enterprise workflows, and end-to-end feature ownership across complex data-rich systems. Proven track record improving release velocity, reducing operational friction, and translating complex technical workflows into scalable product experiences.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript (ES6+), SQL

Frontend: Next.js, React, Redux, HTML5, CSS3, Responsive Design, Accessibility (WCAG)

Backend: .NET, ASP.NET Core Web API, REST APIs, Node.js, Express, FastAPI, JWT Authentication

Desktop / Hybrid: .NET MAUI, Blazor, Electron

Cloud & DevOps: Microsoft Azure (App Services, Azure SQL, Azure OpenAI), Azure DevOps, CI/CD Pipelines, Docker

Tools: Git, GitHub, Bitbucket, VS Code, JetBrains Rider, Figma, SSMS, NuGet

PROFESSIONAL EXPERIENCE

TÜV SÜD — Software Engineer — Full Stack

United States • Dec 2022 – Present

Building enterprise inspection and compliance platforms serving 5,000+ users across 12+ countries.

- ▶ Architected SMARTS ReportBuilder, a schema-driven UI platform for dynamic form and report generation without redeployment, eliminating 3–4 engineering days per release cycle and increasing system flexibility for non-technical stakeholders.
- ▶ Built and deployed an end-to-end AI chatbot for GRC Connect across multi-region clients, designing a FastAPI backend, JWT-based authentication, and secure C# APIs to execute model-generated SQL, reducing manual data retrieval time by 80% and improving response accuracy through iterative feedback loops.
- ▶ Owned end-to-end delivery of SMARTS Central, a scalable React + .NET platform supporting multi-step inspection workflows, optimizing rendering, API data flows, and state orchestration to reduce perceived load times by 25–40% across critical user journeys.
- ▶ Designed and scaled a reusable component library and shared state management architecture adopted across 3+ internal applications, reducing per-feature development time by ~30%.
- ▶ Owned the migration from manual deployments to Azure DevOps CI/CD pipelines, increasing release reliability and enabling more frequent, lower-risk deployments.
- ▶ Partnered cross-functionally with product, design, and backend teams to define API contracts, DTO schemas, and data models powering dynamic enterprise workflows at global scale.
- ▶ Mentored junior engineers through code reviews and technical guidance, improving code quality and consistency across shared internal platforms.

Astriata — Software Engineer — Frontend / Full Stack

Remote • Nov 2021 – Nov 2022

- ▶ Developed responsive, accessible web applications in React and TypeScript across healthcare, government, and education sector clients.
- ▶ Built a reusable component library adopted across 4+ client projects, standardizing UI patterns and reducing new project UI setup time by 30%.
- ▶ Translated Figma designs into production-ready React components, consistently meeting accessibility (WCAG) and performance requirements.
- ▶ Collaborated directly with backend engineers and client stakeholders to ship production features aligned to business requirements.

Freelance — Software Engineer — Frontend / Full Stack

Remote • Dec 2020 – Dec 2021

- ▶ Designed and developed client websites and web applications using React, HTML5, CSS3, and JavaScript; refactored existing platforms to improve responsiveness, accessibility, and SEO performance.

- Developed Unity3D game projects in C#, independently implementing core gameplay systems and mechanics.

PREVIOUS EXPERIENCE

Gladstone Design, Inc. — Design Engineer

New Jersey • Sep 2019 – Dec 2020

- Standardized internal engineering workflows by introducing project checklists, reducing preparation time by ~50%.
- Designed stormwater management systems that reduced construction and maintenance costs by up to 60% on multiple projects.

Geo-Technology Associates, Inc. — Construction Inspector

New Jersey • Sep 2018 – Aug 2019

- Conducted construction site inspections and assisted geotechnical engineers with soil investigations, site evaluations, and technical reporting.

EDUCATION

New Jersey Institute of Technology (NJIT) — Bachelor of Science, Civil Engineering • 2018

Domain expertise in engineering workflows, infrastructure systems, and technical compliance — directly applicable to software built for the engineering sector.
